Article index – Volume 47

Number 1

Systematic Reviews in Evidence-based Software Technology and Software Engineering
M. Dyer, M. Shepperd and C. Wohlin 1

Assessing effort estimation models for corrective maintenance through empirical studies
A. De Lucia, E. Pompella and S. Stefanucci 3

Software productivity and effort prediction with ordinal regression
P. Sentas, L. Angelis, I. Stamelos and G. Bleris 17

Adaptive fuzzy logic-based framework for software development effort prediction
M. A. Ahmed, M. O. Saliu and J. AlGhamdi 31

A comparison of four process metamodels and the creation of a new generic standard
B. Henderson-Sellers and C. Gonzalez-Perez 49

Number 2

Business-oriented process improvement: practices and experiences at Thales Naval The Netherlands (TNNL)
J. J. M. Trienekens, R. J. Kusters, B. Rendering and K. Stokla 67

Designing an adaptable heterogeneous abstract machine by means of reflection
F. Ortin and D. Diez 81

A documentation infrastructure for the management of data mining projects
K. Becker and C. Ghedini 95

An exploratory study into the use of qualitative research methods in? descriptive process modelling
L. Carvalho, L. Scott and R. Jeffery 113

Fast mining of frequent tree structures by hashing and indexing
D. Katsaros, A. Nanopoulos and Y. Manolopoulos 129

PII: S0950-5849(05)00162-X

Number 3

Evaluating the ordering of the SPICE capability levels: an empirical study
H.-W. Jung 141

μ_cROSE: automated measurement of COSMIC-FFP for Rational Rose RealTime
H. Diab, F. Koukane, M. Frappier and R. St-Denis 151

DMC: a more precise cohesion measure for classes
J. Wang, Y. Zhou, L. Wen, Y. Chen, H. Lu and B. Xu 167

EC—a measurement based safer subset of ISO C suitable for embedded system development
L. Hatton 181

NCDS: data mining for discovering interesting network characteristics
M. Zaki and T. S. Sobh 189

An address mapping approach for test data generation of dynamic linked structures
S. Sai-ngern, C. Lursinsap and P. Sophatsathit 199

Number 4

An information extraction approach to reorganizing and summarizing specifications
K. Thirunarayan, A. Berkovich and D. Z. Sokol 215

Replicating software engineering experiments: a poisoned chalice or the Holy Grail
J. Miller 233

A unified classification system for research in the computing disciplines
I. Vessey, V. Ramesh and R. L. Glass 245

Software development productivity on a new platform: an industrial case study
P. Tomaszewski and L. Lundberg 257

Comprehension and quality of analysis specifications—a comparison ?of FOOM and OPM methodologies
J. Kabeli and P. Shoval 271

Number 5

Postmortem reviews: purpose and approaches in software engineering
T. Dingsøyr 293

Virtual workgroups in offshore systems development
S. Sakthivel 305

Deriving requirements from process models via the problem frames approach
K. Cox, K. T. Phalp, S. J. Bleistein and J. M. Verner 319

Supporting cartoon animation techniques in direct manipulation graphical user interfaces
B. H. Thomas and P. Calder 339

Implementation of fuzzy classification in relational databases using conventional SQL querying
Y. Veryha 357

Number 6

A novel approach for component-based fault-tolerant software development
P. Sinha and A. Hanumantharya 365

Does UML make the grade? Insights from the software development community
M. Grossman, J. E. Aronson and R. V. McCarthy 383

Exploring defect causes in products developed by virtual teams
J. Jacobs, J. van Moll, P. Krause, R. Kusters, J. Trienekens and A. Brombacher 399

Resource conscious development of middleware for control environments: a case of CORBA-based middleware for the CAN bus systems
S. Hong and T.-H. Kim 411

Stepwise deployment methodology of a service oriented architecture for business communities
P. Baglietto, M. Maresca, A. Parodi and N. Zingirian 427

Number 7

Translating relational schema into XML schema definition with data semantic

preservation and XSD graph
J. Fong and S. K. Cheung 437
Designing secure databases
E. Fernández-Medina and M. Piattini 463
Requirements engineering for organizational transformation
I. Ramos, D. M. Berry and J. Á. Carvalho 479
Automatic implementation of constraints in component based applications
A. Coronato, A. d'Acierno and G. De Pietro 497

Number 8

From requirements negotiation to software architecture decisions
R. Kazman, H. P. In and H.-M. Chen 511
A lightweight approach for migrating web frameworks
A. E. Hassan and R. C. Holt 521
Deriving objects from use cases in real-time embedded systems
M. T. Kimour and D. Meslati 533
The impacts of quality and productivity perceptions on the use of software process improvement innovations
G. C. Green, A. R. Hevner and R. W. Collins 543
Embedded System Paranoia: a tool for testing embedded system arithmetic
L. Hatton 555
iJob: an Internet-based job execution environment using asynchronous messaging
R. Fatoohi, N. Gokhale and S. Viswesan 565

Number 9

From timetabling to train regulation—a new train operation model
S.-C. Chang and Y.-C. Chung 575
How to steer an embedded software project: tactics for selecting the software process model
P. Kettunen and M. Laanti 587
Web cache management based on the expected cost of web objects
H. Bahn 609
The application of use cases in systems analysis and design specification
M. Ratcliffe and D. Budgen 623

Number 10

Combating architectural degeneration: a survey
L. Hochstein and M. Lindvall 643
Parallel testing of distributed software
A. Lastovetsky 657
A theoretical foundation of variability in component-based development
S. D. Kim, J. S. Her and S. H. Chang 663
Quality and comprehension of UML interaction diagrams-an experimental comparison
C. Glezer, M. Last, E. Nachmany and P. Shoval 675
A survey of component based system quality assurance and assessment
S. Mahmood, R. Lai, Y. S. Kim, J. H. Kim, S. C. Park and H. S. Oh 693

Number 11

Communicating bugs: global bug knowledge distribution
E. Berglund 709
On the specification and implementation of distributed systems using NMDS and LIPS
A. S. Bavan and G. Abeysinghe 721
A study on managing the performance requirements of a distributed service delivery software system
A. Bagchi 735
A framework for evaluating a software bidding model
B. A. Kitchenham, L. Pickard, S. Linkman and P. Jones 747
Experiences of using an evaluation framework
B. Kitchenham, S. Linkman and S. Linkman 761

Number 12

An approach to ontology for institutional facts in the semantic web
R. M. Colomb and C. N. G. Dampney 775
Multi-way spatial join selectivity for the ring join graph
J.-K. Min, H.-H. Park and C.-W. Chung 785
Enhancing class commutability in the deployment of design patterns
T. H. Ng and S. C. Cheung 797
Computing dynamic slices of concurrent object-oriented programs
D. P. Mohapatra, R. Mall and R. Kumar 805
A formal framework for database sampling
J. Bisbal, J. Grimson and D. Bell 819

Number 13

Efficient discovery of multilevel spatial association rules using partitions
L. Wang, K. Xie, T. Chen and X. Ma 829
XML-based requirements engineering for an electronic clearinghouse
M. A. Fecko and C. M. Lott 841
Measuring design testability of a UML class diagram
B. Baudry and Y. L. Traon 859
Automated software size estimation based on function points using UML models
A. Živkovič, I. Rozman and M. Heričko 881

Number 14

A roadmap of problem frames research
K. Cox, J. G. Hall and L. Rapanotti 891
Problem frames and software engineering
M. Jackson 903
An approach to formal automated analysis of problem-frame concerns
M. A. Nelson, T. Nelson, P. Alencar and D. Cowan 913
A UML-based approach for problem frame oriented software development
C. Choppy and G. Reggio 929

Number 15

Most cited journal articles in software engineering
C. Wohlin, S. Elbaum, M. Shepperd 955
An analysis of the most cited articles in software engineering journals—1999
C. Wohlin 957
Engineering a software tool for gene structure prediction in higher organisms
G. Gremme, V. Brendel, M. E. Sparks and S. Kurtz 965
A measurement framework for object-oriented software testability
S. Mouchawrab, L. C. Briand and Y. Labiche 979
BP's multi-enterprise asset management system
C. P. Holland, D. R. Shaw and P. Kawalek 999
Software project management using PROMPT: A hybrid metrics, modeling and utility framework
D. M. Raffo 1009
Simulating families of studies to build confidence in defect hypotheses
F. Shull, D. Cruzes, V. Basili and M. Mendonça 1019
